

ANURAG REDDY AENUGU

<https://www.linkedin.com/in/anuragreddya/> | hellanurag@gmail.com | +1 (980) 242 7150

SUMMARY

Senior analytics leader with **12 years of experience building enterprise AI & ML platforms. 7 years leading global Data Science and Engineering teams, with 3 years as leader of leaders.** Recognized for successfully delivering enterprise critical projects, with **Caterpillar CEO award** (Top 1%, for \$22B demand forecast), and **Tredence STAR award** (Top 1%, for \$10B supply chain optimization).

SKILLS

AI / ML: Generative AI, Agentic AI, Hybrid RAG, LangGraph, MCP, MLOps, Knowledge Graphs, LLMs, Machine Learning, NLP

Languages & Tools: Python, SQL, PySpark, dbt, PyTorch, Keras, Scikit-learn, Pandas, Power BI, GitHub

Cloud & Data Platforms: AWS, Azure, GCP, Snowflake, Databricks, Spark, Hadoop

PROFESSIONAL EXPERIENCE

CATERPILLAR (*Fortune 50, \$64B revenue*) | **Senior Analytics Manager** **June 2021 – Present | Irving, TX**

- **Leadership: Lead a global analytics team of 14** - 2 analytics managers, project manager, 6 data scientists and 5 data analysts.
 - Own strategy and execution of enterprise AI initiatives in procurement, cost and risk analytics departments.
 - Manage \$5M budget and multiple concurrent data science programs, shaping enterprise decisions.
 - Recruit, mentor and develop high-performing analytics talent, leading full lifecycle of ML products.
 - Responsible for enterprise semantic data layer, enabling next-gen technology, ML deployments, standardized metrics.
- **Enterprise AI Programs: Architect and develop AI & ML products** to drive enterprise scale digital transformation.
 - **Cost Analytics:** Agentic AI platform built on knowledge graphs with suite of ensemble models to optimize \$25B direct procurement spend. \$300M+ cost reduction opportunities identified and \$25M+ savings realized.
 - **Risk Analytics:** Time series, tree, and transformer algorithms monitoring 7K suppliers and 800K parts across 63 countries to predict supply disruptions and bolster supply resiliency. Strategically optimized recall and precision metrics to build trust and drive adoption, capturing more than 70% of potential disruptions with 50% lead accuracy.
 - **Gen AI:** Enterprise's first AI platform 'ChatDocs' built on RAG architecture, LangChain, vector db, custom multi-modal extraction pipeline and human-in-loop validation to process 100K+ contracts and extract 150+ elements, reducing time from weeks to minutes.
 - **Analytics Data Layer:** Develop enterprise semantic data layer, a single safe source of consumption ready data and standardized metrics. Accelerated downstream analytics by an estimated 30%, and significantly improved data quality and reporting process.
 - **Demand Forecast:** Increased reliable planning signal coverage for 800K active parts from 32% to 99% spend (\$22B).
- Entrusted with the strategic initiative of advancing analytics capabilities in India – built analytics org from ground up.
- Mentor a class of 12 in AI at Purdue university under the Data Mine program, a strategic partnership to develop future talent.

TREDENCE (*Gartner leader, Inc. 5000*) | **Lead Data Science Consultant** **July 2017 – June 2021 | San Jose, CA**

- Led projects at numerous Fortune 500 firms, providing analytics services as a **data science and engineering consultant**.
- **Supply chain ML platform:** Led a team of 21 data scientists, engineers and software developers to develop "eCompass".
 - Developed highly scalable, efficient ML models to predict sales and optimize supply chains. Reduced out of stock incidents by 6%.
- **CX AI-Orchestration:** Designed and developed omni-channel Data Science As A Service (DSAAS) platform, to generate personalized content. Automated A/B testing for recommendation engine, customer segmentation, and Natural Language Generation (NLG).
 - Empowered Digital Sales and Customer Success teams to improve marketing campaigns across multiple channels.
 - Reduced new marketing campaign timeline from 120 days to less than 30 days, and improved click rates by 30%.

FUZZY LOGIX (*In-database analytics, Fintech*) | **Data Scientist** **July 2014 – June 2017 | Charlotte, NC**

- **DBLytx:** Led a team of 5 data scientists to **develop and manage the life cycle of in-database analytics library**. Responsible for statistical and data mining algorithms development, database management, packaging, testing, documentation, deployment, and quality control. Led multiple GA releases on Teradata, Netezza, and Aster data, generating more than \$2M in revenue.
- **Fintech Analytics:** Designed ER diagrams, ETL workflows, and developed algorithms for capital market index calculation, rebalancing, and industry classification. Engaged with partners and clients to provide support, demos, training, and marketing materials.
 - Entrusted to lead client engagement, cloud deployment and develop fin-tech solutions in Hong Kong by the CEO.
- Trained and supervised 6 new hires and 9 interns.

EDUCATION

Indian Institute of Technology (IIT) Kanpur **July 2009 – June 2014 | Kanpur, India**

Master of Technology in Mechanical Engineering, Computational Mechanics

Thesis: Deformation simulation using parallel computational scheme for Optimal Transportation Meshfree methods.

Bachelor of Technology in Mechanical Engineering

KVPY fellowship for excellence in Science by Dept. of Science and Technology, Govt. of India. (125 from all over India)
